

# LOLER

## LIFTING OPERATIONS & LIFTING EQUIPMENT REGULATIONS 1998

***DON'T IGNORE HER; SHE'S NOT JUST A DANCING GIRL!***

ADMINISTERED BY THE HEALTH AND SAFETY EXECUTIVE  
LOLER CAME INTO FORCE ON 5<sup>TH</sup> DECEMBER 1998

DOES IT AFFECT YOU?

**YES!**

Richards Residential Supplies Limited have been serving the Nursing and Residential Care Home industry for almost a quarter of a century. With a combined knowledge base of over a century, we take pride in keeping abreast of new technologies and in passing on our knowledge and expertise to our clients.

As approved distributors for all the major hoist manufacturing companies we are regularly notified of any risk issues that may potentially harm residents or staff. We also subscribe to the MHRA, Medicines and Healthcare products Regulatory Agency who keep us informed regarding safety warnings, alerts and product recalls.

It is with this knowledge and proven backup that we have been offering the LOLER test and comprehensive service facility to our clients for the past eight years. With an extensive in house database we are able to raise, log and follow the maintenance and LOLER history of each individual item of equipment. As can be seen from the sample documentation attached, contrary to popular belief, Load Testing forms only a small part of the LOLER requirements!

We consider ourselves professionals in delivering a proven, complete and comprehensive LOLER service for all lifting and handling devices designed to raise or lower a person. We do not carry out LOLER testing on Passenger Lifts, Cranes or other heavy duty lifting devices, all of which require their own specialized knowledge and expertise.

For a free on site device assessment and report please contact us on **FREephone 0800 074 3749**.
